REGISTER NOW

Agenda:

- Data Privacy Breach
- Compliance and regulation on data privacy
- How to choose a DB protection technology - Storage, Folder or column/field encryption?
- Online key rotation, Key backup, key encryption
- DataSecure Demo

Lucky Draw Prize:
iPhone

REGISTER NOW!

With a 43% increase in e-crimes, intrusions and security breaches, leading enterprise and government organizations worldwide rely on SafeNet DataSecure solutions to ensure data integrity and to prevent fraud, abuse and data theft.

It allows organizations to enforce regulatory compliance and limit liability by protecting sensitive data accessed by employees, customers or third parties.

SafeNet DataSecure (Enterprise Database Encryption Solution)

IT operations, compliance and security organizations must protect the strategic information in their databases from misuse, mistakes, insider abuse, and external threats.

SafeNet DataSecure solutions delivers complete database security, which centralizes all cryptographic processing, key management, logging, auditing, and security policies on a single, hardened appliance, which maximizes overall security. It is the most secure, fastest to implement, and easiest to manage end-to-end enterprise data protection solution available which protects application, network, and database layers.

Come join us at the event to learn how SafeNet DataSecure solution provides you the comprehensive solution that addresses all your database security concerns.

To RSVP for the event, please email Ms. Naruwan Rodsumran at marketing@stream.co.th or call 2679-2233 ext. 170.
